

DOXIMITY DIRECTIONS FOR ANCILLARY STAFF

Once you have a provider in your Division who has signed up with Doximity, then you can join their care team by following this link:

Free HIPAA Secure App to Call Patients from Home

In response to the COVID-19 pandemic, Doximity has opened up free Dialer access to any healthcare professional working with a physician on Doximity. With Doximity's Dialer feature, users can call patients from their cell phone while displaying their office number on the patient's Caller ID.

Step 1:
Sign up for a free Doximity account.

Step 2:
Join a Physician's Care Team, (to verify your HCP status).

Here you can make your own account and link it to a provider who has an account on Doximity (you don't have to link it to multiple providers, just one covers your ability to use it).

Once you have completed these steps, then you can download the phone app and use your phone as a relay dialer as well. UICOMP has asked us to start doing this as a way to increase HIPAA compliant communications while working remotely from home.
