

HOW TO USE RDWEB ON A MAC

1. Open the App store program, then search for and install Microsoft Remote Desktop 10

2. Open a web browser, and go to <https://com-p-ts2012.ad.uic.edu/RDWeb>
3. Sign in with your netID and password
4. Click on the icon representing your computer. This should download a file.
5. Open this file, it should launch the program you just downloaded.
 - o If it does not, manually open Microsoft Remote Desktop on the Mac and under the "Connections" tab at the top of your screen, choose "Import Desktops"
 - o Path to the file you downloaded from the RDWeb page and open it.
6. It should prompt you to log in. Make sure you put "ad\" in front of your netID.

7. It may prompt you one more time to log in after this. You do not need "ad\" for this one.
8. Great job, you should be remoted into your work desktop!
